• PROJECTS

1. Training Management System For Palestine Technical University- Kadoorie, 2023.

- Technologies used: Node.js, React and Sequelize.
- This project has been developed to initiate the transformation of the university's training system into an electronic platform.

- Potential users:

Training officers: send requests for student's training to companies

Company: accept/reject training request then assign trainer to the student

Student: record the daily skills they have acquired and submit it to the trainer.

Trainer: review and approve student requests.

- GitHub Link: [<https://github.com/PTUK-Training-Manager/GraduationProject.git>]
